UNITED STATES PATENT OFFICE.

CHARLES H. METZ, OF WALTHAM, MASSACHUSETTS.

DESIGN FOR A WRENCH-FRAME.

SPECIFICATION forming part of Design No. 29,520, dated October 18, 1898.

Application filed August 22, 1898. Serial No. 689,252. Term of patent 7 years.

To all whom it may concern:

Be it known that I, CHARLES H. METZ, of Waltham, in the county of Middlesex and State of Massachusetts, have invented and produced a new and original Design for Wrench-Frames, of which the following is a specification, reference being had to the accompanying drawings, forming part thereof.

Figure 1 represents a side elevation of a wrench-frame, illustrating my new design. Fig. 2 represents a transverse sectional view thereof.

The leading feature of my new design for

wrench-frames consists in the design as herein shown and described.

As shown in the drawings, the lines of the front and lower portion of the head 5 incline outward and downward at angles from the face 7 to form the rectangular extensions 6.

What I claim is—

The design for a wrench-frame as herein shown and described.

CHARLES H. METZ.
